

RESOLUTION BT 2/1992

Subject: Normative References in ENs

BT having considered the need to make normative reference in the ENs under preparation, requests the CEN/TCs to limit the number of normative references to the minimum needed for the operation of the European Standards, confirms the possibility to make reference to prENs under CEN Enquiry provided that such prENs do not refer themselves to documents still under development at working body level.

BT asks CEN/CS to monitor the matter.
