

Change of deliverable for work items neither mandated nor covered by a Specific Agreement - Checklist

The change of deliverable by a CEN/TC is considered when the following criteria have been carefully studied:

- the draft is in conformity with the CEN/TC work specifications;
- the change of deliverable is justified;
- the relevant work item is neither mandated nor covered by a *Specific Agreement*;
- when deciding to change from EN to CEN/TS or CEN/TR, is the standstill:
 - to be released; or
 - to be maintained (in such case, decision should be submitted to BT)

In case of change from CEN/TS into CEN/TR, the decision shall be taken by simple majority, non weighted voting.

In case of change from EN to CEN/TS or CEN/TR (release of standstill), the decision shall be taken by weighted voting.
