

## DECISION BT 027/2023

Subject: \*\* Adoption of ISO/IEC JTC1 standards – New work Items

BT,

- having noted
  - D158/C036 & BT C162/2017 concerning the ISO/IEC JTC 1 'Information technology' standards being exempted from parallel procedures;
  - the need to ensure transparency and to include all national stakeholders while defining a position within the relevant CEN-CLC/JTC as quickly as possible;
  - the report of the CEN-CLC/BTWG 14 'R&P' meeting of 2023-09-27 (see Annex 1 to BT N 14741 & BT175/DG14300/REP);
- agreed to delegate to CEN-CLC/JTCs, as of 2024-02-01, all decisions concerning the approval of New Work Items that are:
  - adoptions of already published ISO/IEC JTC 1 deliverables;
  - to be developed in parallel with ISO/IEC JTC 1 new projects;
- decided that CEN-CLC/JTC decisions are to be taken following an 8-week consultation period (weighted vote for ENs and TSs, and by simple majority for TRs -- in line with the corresponding CEN-CENELEC IR2 voting rules at Enquiry and/or (Formal) Vote stages);
- requested relevant CEN-CLC/JTCs to inform CCMC at the same time as when a vote is launched for such cases, in order for CCMC to inform BTs accordingly (e-mail);
- invited CCMC to assess the possibility to have this information on the NWI launch in an automated way;
- asked CCMC to assess the process after one year, i.e. mid-2025.

*\*\* common with CLC/BT decision D175/011*

*This decision is applicable as from: 2023-02-01*
