

### EXAMPLE 7 Checking Output Size of Figures.

To check the output size of a figure, click on the figure, and then from the ribbon across the top of Word, choose 'PICTURE TOOLS' and then 'FORMAT'.

Click the highlighted arrow, and the following box will pop out:

As shown, the 'scale' is 100% for both height and width, relative to original picture size. This means the figure file provided has not been manually cropped or resized in Word, and therefore conforms to the requirements defined in Clause 4.3.
