

RESOLUTION BT 15/2003 (Corrigendum)

Subject: Use of the CEN Commenting Template (at all stages)

Taking into account :

- the need for improving the handling of comments expressed by the CEN Members at the different stages of approval of a document;
- the existing "CEN commenting template" available on the BOSS;
- the need to compile voting comments in revisable format (Word);

BT requests the CEN Members to deliver by 2003-06-01 all comments using the ISO/CEN commenting template at all stages of approval of any document. Comments that are not delivered according to this format will be disregarded as from this date.

BT notes that a transition period of 4 months will elapse before CMC will be in a position to deliver complete voting reports in Word format (until 2003-09-30).

NOTE: In the case of PQ/UQ, parallel Enquiries, COCOR Vote, Formal Votes and UAPs, comments should be addressed to CMC at cenvote@cen.eu until the e-balloting platform is implemented.

This Resolution is applicable as from: 2003-04-24
