

RESOLUTION BT 37/2004

Subject: Negative Formal Votes/UAP - Procedure

BT/TCMG, on behalf of BT, decides that the following process will be implemented on 2004-10-01 in order to ensure a timely progress after a negative Formal Vote or UAP:

- CMC identifies each month the projects for which negative results of a Formal Vote or UAP have been made available more than 3 months before and for which a revised draft is not yet available for submission to an adoption procedure;
- CMC reminds the Secretary of the responsible Technical Committee (with copy to the corresponding BT Member) that a revised draft must be sent to CMC within 6 months from availability of the negative results of the Formal Vote or UAP and that any work item for which that does not happen shall be deleted;
- If no revised draft is received in time, the work item is deleted and CMC confirms the deletion to the Secretary of the responsible Technical Committee (with copy to the corresponding BT Member).

This Resolution is applicable as from: 2004-09-07
