

## **RESOLUTION BT 39/2004**

**Subject:** Work items stuck just before FV/UAP - Procedure

BT/TCMG, on behalf of BT, decides that the following process will be implemented on 2004-10-01 in order to ensure a timely progress of work items stuck just before Formal Vote or UAP:

- CMC identifies each month the projects for which a draft has been sent to CMC for submission to Formal Vote or UAP more than 6 months before and for which the Formal Vote or UAP has not yet been launched because of an insufficient level of quality or a negative assessment by a CEN Consultant;
- CMC reminds the Secretary of the responsible Technical Committee (with copy to the corresponding BT Member) that a revised draft must be sent to CMC within 3 months and that any work item or which that does not happen shall be deleted;
- If no revised draft is received in time, the work item is deleted and CMC confirms the deletion to the Secretary of the responsible Technical Committee (with copy to the corresponding BT Member).

*This Resolution is applicable as from: 2004-09-07*
