

RESOLUTION BT 43/1995

Subject: Correction of definitive texts of European standards made available by CEN/CS

BT reaffirms the responsibilities for correct ratified texts. If, in exceptional cases which will be documented with a view to reducing the number to zero, a correction is necessary after the delivery of the ratified text, the following procedure will apply: in order to speed up the correction of documents and to inform the Members before they have prepared their final national version, CEN/CS is authorized to send letters with minor corrections within one month (in exceptional cases up to three months) of the DAV.

It is understood that in the case of new pages or title pages, these have to be marked with the word "Corrected" and the new date indicated.
