

RESOLUTION CA 7/1994

Subject: Production

The CEN/CA,

- having noted the report of the Vice-President on technical matters and notably the concern expressed regarding the production of ENs on the one hand and the stock of drafts at final stages of the CEN procedure on the other hand,
 - having noted the letter CA CORR 1089 dated 1994-06-22 signed by the CEN President, Vice-Presidents and SG,
 - endorsing Resolution BT 84/94,
 - instructs the CEN/CS to proceed to the immediate ratification of all ENs as soon as the Formal Vote results are positive, taking into account purely editorial modifications, but without allowing the TCs to consider "technical improvements" of the ENs at this stage;
 - authorizes the BTSs to decide, after consultation with the responsible TCs and with the CEN consultants when applicable, to submit to the Formal Vote those urgently needed pr ENs for which the Enquiry has not suggested the existence of important disagreements;
- agrees on the CEN/SG proposal to create in CEN/CS a special unit under the direct authority of the CEN/SG , having direct access to CEN/CA members to solve critical cases.
