

## **RESOLUTION CA 36/1996**

**Subject:** CEN Optimization - Delegated Decisions to CEN/TCs

Considering that there was a pilot phase decided by CA for the introduction of delegation by BT of decisions taken by CEN/TCs on specific matters, that this pilot phase can be concluded as having given positive results,

- the CA confirms this new practice while asking CS to improve the electronic tools that support this practice based on the results so far of the pilot phase,
- the CA requests BT to extend further the delegation of decisions following an analysis of what is feasible and upon a proposal worked out by the CS. This further delegation is to be made depending on the TC having an approved Business Plan.
- the CA asks the CS to investigate, and BT to decide, the application of the use of electronic mail for the transmission of the TC resolutions into the CS Information System via the CS.

The CA asks the BT members to ensure that their TC secretaries make maximum use of the electronic tools that are provided.
