

Approval of a package of ENs - Checklist

The approval of a package by a CEN/TC is considered when the following criteria have been carefully studied:

- the package has been requested by a CEN National Member;
- the package is constituted of work items which are all included within the programme of work of the relevant CEN/TC;
- all the delegates of the CEN/TC and the CEN National Members are well informed that extension of date of withdrawal (dow), if any, cannot go beyond 3 years later than the date of availability of the first standard of the package;
- the requested information on the existence of the package, on the dow and on the inter-related items is explained in the foreword of each standard of the package;
- the constitution of the package and the proposed dow foreseen shall be submitted during the CEN enquiry of the first work item of the package;
- the CEN National Members are informed that it shall include a cautionary note in the national implementation of the ENs, and informed of the content of this note;

The decision shall be taken by simple majority, non-weighted voting.
