

DECISION BT 13/2018

Subject: Mandatory use of Projex-Online Work Area

BT/TCMG on behalf of CEN/BT,

- noting
 - the current decisions available in the Projex-Online Working Area for registration (Annex 1 to BT N 11102);
 - that the TC secretariats already use the possibility of registering their decisions directly in the application in 62% of the cases;
 - that the use of the application will improve the communication of the necessary decision elements to CCMC thus reducing delays in processing of decisions;
 - that the use of the application for the decisions processed automatically will allow to have the NWI/updates available on Projex-Online the day after their submission, thus reducing unnecessary tasks and delays in processing decisions;
 - that the decisions for which the use of the use of the Projex-Online Working Area is optional always have to be checked by CCMC (even when the process is fully automatic);
- decides to make submission through the Projex-Online Working Area mandatory for all decisions available in the application as of 2018-07-01;
- asks CCMC to organize a training to TC Officers on effective decisions-taking in TC meetings.

This decision is applicable as from: 2018-04-10
