

DECISION BT 017/2021

Subject: Simplification - New TC delegated decision for the transposition of an ISO publication into a CEN/TS or CEN/TR under VA

BT/TCMG, on behalf of BT,

- noting
 - o Resolution BT 7/2006 on the transposition of an ISO publication into a CEN/TS or CEN/TR;
 - o that a significant number of requests are made to the BT for the registration of CEN/TS and CEN/TR under Vienna Agreement with CEN or ISO lead, as well as for the adoption of existing ISO deliverables into CEN deliverables;
 - o that according, to the statistics available, the above-mentioned requests have been approved in 100% of cases;
 - o that each of the above-mentioned requests generates a significant administrative burden for the TC, CCMC and the CEN/BT and delays the start of the technical work at WG level;
 - o that in specific sectors, TS and TR are the appropriate deliverables to be developed at global level. In such sectors, TS are often referenced in European legislation;
 - o that this topic was discussed at the 92nd CEN/BT meeting (BT N 12414), was positively received without any objections;
- decides
 - o to delegate the decision to approve the registration/adoption of an ISO/TS as a CEN ISO/TS or of an ISO/TR as a CEN ISO/TR under Vienna Agreement to the relevant CEN Technical Committee.
 - o the Technical Committees shall take the delegated decision as part of the NWIP decision. In the proposal, a clear and solid justification shall be given by the TC under section 3 "Explain the purpose and give a justification for this proposal" of the NWIP form;
- reminds CEN/TCs of the ISO global relevance policy;
- invites CCMC
 - o to report to BT on the registration/adoption of TSs and TRs under VA after one year of the implementation of the decision;
 - o to update the CEN BOSS accordingly.

Note: This decision supersedes Resolution BT 7/2006.

This decision is applicable as from: 2021-07-08
